“We are proud of the quality care our entire Children’s Mercy staff provides each day—their compassion and commitment is truly unmatched,” adds Children’s Mercy president and CEO, Randall L. O’Donnell, PhD

Providing the best care for kids.

It really is that simple for the doctors at Children’s Mercy Hospitals and Clinics because, for us, every child and family deserves the highest quality of medical care, and we are proud to have the staff, facilities and resources to deliver on that promise.

What is rare and uncommon at other hospitals is routine at Children’s Mercy.

Our staff of more than 400 pediatric specialists and surgeons continues to identify innovative ways of providing care in more than 40 specialty areas. For the second year in a row, Children’s Mercy is the only hospital in Kansas City to be ranked among the nation’s top pediatric medical centers in all 10 specialties rated by *U.S. News & World Report*, a national recognition that reflects our goal—to offer world-class pediatric expertise, research and clinical care.

“We are proud of the quality care our entire Children’s Mercy staff provides each day—their compassion and commitment is truly unmatched,” adds Children’s Mercy president and CEO, Randall L. O’Donnell, PhD. “Being recognized among the nation’s best children’s hospitals for the fifth consecutive year and second year in all 10 specialties is a testament to their exceptional care.”

With more than 48,000 square feet of laboratory and research space, 200-plus physicians and scientists actively involved in conducting research and clinical volumes exceeding 500,000 patient encounters

per year, we are also making great strides in the area of pediatric research. In areas such as kidney disease, cancer, neonatology, pediatric heart care, clinical pharmacology and genomics, we are at the forefront of research to improve care and cure disease for children here and around the world.

The robust clinical and research programs also make Children’s Mercy an ideal academic environment. We are the region’s leading pediatric teaching institution, training the next generation of pediatric specialists, nurses and medical students including those at the University of Missouri-Kansas City and the University of Kansas.

It is no wonder—with a staff focused on expertise, innovation and a commitment to providing excellent patient care—that Children’s Mercy continues to reach new heights in providing the best pediatric care.

We are working wonders every day to help children go on to live healthier, more active lives.
