USC Institute of Orthopaedic Surgery

The Keck Medical Center of USC is proud to offer one of the most extensive orthopaedic programs in the United States, providing a comprehensive approach for diagnosis, treatment and rehabilitation of orthopaedic disorders.

Our USC centers of excellence are home to some of the best orthopaedic surgeons in the country. They offer a wide range of care and service in every major orthopaedic specialty including sports medicine, joint preservation and replacement, elbow and shoulder reconstruction, spinal care and surgery, and foot, ankle and hand surgery.

The USC Center for Sports Medicine's highly experienced physicians are the official doctors of USC Trojan Athletics, including USC football and basketball. They provide the highest level of care to patients who suffer from athletic injuries or related problems.

Skilled in less-invasive surgical techniques and special pain management protocols geared to speed recovery from surgery, our experts at the USC Center for Joint Preservation and Replacement provide patients with the comprehensive and compassionate care they need to return to doing the things they love. Our team applies the latest technologies including robotic surgery to treat the most complex patients to restore their mobility and function. Our focus is on our patients, and our goal is for their rapid recovery so they can return to their active lifestyles as soon as possible.

- Timothy P. Charlton, MD**, surgery of the foot and ankle.
- Lawrence D. Dorr, MD**, joint replacement of the hip and knee.
- George (Rick) Hatch, III, MD**, sports medicine and joint preservation; cartilage preservation and knee osteotomy.
- Jay R. Lieberman, MD**, primary and revision total hip and knee replacement and treatment of osteonecrosis (bone death) of the hip and knee.
- Donald B. Longjohn, MD**, hip and knee replacement and revision surgery.
- Daniel A. Oakes, MD**, primary and revision knee and hip replacement and unicompartmental knee replacement.
- Reza Omid, MD, MS**, sports injuries of the hip, shoulder, elbow and knee, as well as joint replacement of the shoulder and elbow.
- Jeremy S. Smith, MD**, advanced treatment of degenerative spinal conditions, with an interest in spinal trauma, spinal tumors, and complex spinal deformity.
- Mark J. Spoonamore, MD**, complex spine disorders, including spine tumors, spine trauma, and spinal deformity
- Milan Stevanovic, MD, PhD**, surgery of the hands and upper extremity with expertise in reconstructive microsurgery and limb and digit replantation.
- James E. Tibone, MD**, sports medicine, cartilage preservation procedures and total shoulder replacement.
- Carleton Thomas Vangsness, Jr., MD**, operative treatment and prevention of orthopaedic and sports-related injuries.
