

Imagine an entire clinic of experts working together to care for you and those you love. Imagine that your personal physician has immediate access to specialists in virtually every area of medicine. Think of the peace of mind that comes from having more than 300 doctors dedicated to being *Your Doctors for Life*.

It all began on a cold morning in January 1949, when Mavis P. Kelsey, Jr., M.D., returned to his home state of Texas, after saying goodbye to his colleagues at the Mayo Clinic. Dr. Kelsey envisioned the creation of a premier medical group, offering general medical care from personal physicians, along with the highly focused expertise of specialists in virtually all medical disciplines. His dream became a reality when he founded Kelsey-Seybold Clinic in the Texas Medical Center 57 years ago.

KELSEY-SEYBOLD'S BREAST DIAGNOSTIC CENTER EXEMPLIFIES OUR COLLABORATIVE APPROACH TO HEALTHCARE. IT'S ONE OF THE NATION'S LEADING MODELS FOR FAST-TRACKING THE DIAGNOSIS OF BREAST DISEASE.

Today, Kelsey-Seybold Clinic, part of the renowned St. Luke's Episcopal Health System, is one of the Southwest's most respected and experienced medical groups. Physicians in more than 40 medical specialties collaborate in caring for patients who come across town, across the country, and from around the world to experience our unique brand of medicine.

Kelsey-Seybold Clinic is nationally recognized for excellence. In 2006, the American College of Surgeons Commission on

Cancer awarded Kelsey-Seybold Clinic a three-year approval with commendation for cancer treatment, research, and supportive care. Kelsey-Seybold Clinic is the only freestanding cancer program in the nation approved by the Commission on Cancer. Kelsey-Seybold's Lipid Clinic was honored in 2005 as a Model of Excellence by the American Medical Group Association. Kelsey-Seybold's innovative disease management programs help patients manage healthcare risks and diseases by emphasizing prevention, early detection, and early intervention.

Kelsey-Seybold's Breast Diagnostic Center is one of the nation's leading models for fast-tracking the diagnosis of breast disease. This unique Center of Excellence is housed at Kelsey-Seybold's Main Campus, near the Clinic's original home in the Texas Medical Center.

"The Breast Diagnostic Center is designed to provide the answers that women need and deserve through an efficient, one-stop process. Our goal is to make an impact from the beginning, at the point of diagnosis, when more treatment options are available," said Treneth Baker,

M.D., Associate Chief of the Surgery Department and Medical Director of the Breast Diagnostic Center at Kelsey-Seybold Clinic.
